

Tyler Kimmons

User Experience Designer

I am a creative professional with project experience from concept to delivery, a Woo team member who consistently encourages and empowers peers to be their best, and a champion of the "Three Legged Stool."

I enjoy a collaborative environment with dynamic communication, breaking down complex problems, and creating data-driven solutions.

Work Experience

April 2022 – Current

UX Designer

Best Buy Corporation

- Collaborated with cross-functional product teams to create accessible and impactful solutions throughout the digital and in-store channels across Best Buy.
- Enabled users to make data-driven decisions by empowering them with tools to streamline their process in testing their data-analysis hypotheses.
- Led design initiatives to help teams embed external integration and manage the flow of data on the Best Buy website to meet security and data privacy standards.

February 2020 – April 2022

UX Designer

Point Click Care

- Designer for a world-class healthcare platform that facilitates collaboration with providers across the continuum to improve patient care and outcomes.
- Created and maintained web-first content for the Home Health platform embedded on a product incubation team, translating ambiguous problems into meaningful experiences.
- Worked in an agile environment, collaborating extensively with developers and product owners from concept to delivery.

August 2019 – February 2020

UX Designer

Prime Digital Academy

- The curriculum spans the entire end-to-end design process—including up-front user research, wire-framing and design, interactive prototyping and evaluation.
- Created a mobile first application designed to streamline the process of booking a service with an independent contractor.
- Designed digital solutions, as well as conducted in person and remote interviews for design teams at companies such as; 3M, Instacart, and GenEqty.
